

**Dr Brown's**  
natural flow®

**Glass Bottle Sleeve**

**WARNING!**

These bottle sleeves are designed to help protect Dr. Brown's® glass bottles, but they cannot prevent all instances of breakage. Be sure to read the entire Bottle Instructions included with your Dr. Brown's® glass baby bottles.

**Cleaning**

Clean thoroughly before first use. Dishwasher safe (top rack only). Safe for use in electric sterilizer, microwave sterilizer or boiling water. Note: Water or soapy water aids in sliding the sleeve onto the bottle.

**For your child's safety and health****WARNING!**

Always use this product with adult supervision. Never use feeding nipple/teats as a pacifier/soother or teether. Continuous and prolonged sucking of fluids will cause tooth decay. Always check food temperature before feeding. Always check the nipple/teat for signs of wear and replace when damaged. Do not use a microwave oven to heat the bottle because microwave ovens can create hot spots in milk/formula or bottle components. The components of this bottle are not toys and should not be given to children to play with or suck on. Keep all components not in use out of the reach of children. Do not leave the product in direct sunlight or heat or leave in disinfectant (sterilizing solution) for longer than recommended, as this may weaken the nipple/teat. Change spouts after approximately 6 weeks of use. When used and sterilized intensively, nipple/teats may deteriorate after 6 weeks. Do not allow a child to walk or run while using this bottle.
